The 5 Principles of Memorization

1. **Know the Meaning:** Always find out the meaning of what you are learning and write it down if necessary. When you are learning words, don't ignore how prefixes and suffixes affect meaning. Additionally, you should practice repeating the meaning of each word out loud.

2. **Focus on the Form:** All language is made up of two things: the meaning and the words which carry that meaning. Form includes how it sounds, how it's pronounced, and how it's written. Form also includes noticing patterns in grammar and word order in phrases. Find out how to say each word and practice until you can pronounce it correctly.

3. **Practice Aloud:** We learn and remember language better when we practice it physically, building muscle memory. Practice your words, phrases, or grammar out loud, repeatedly. Say it again and again until it becomes automatic and you can do it without looking.

4. **Apply it:** Applying it well means using what you are learning in real situations. If it's part of a lesson, practice teaching it to your companion. Finally, think about the meaning of what you say and express it with feeling.

5. **Plan Spaced Reviews:** Step 5 moves language to your long-term memory where it will remain for good. Early reviews should be done aloud and may require you to use notes or materials to look up certain parts. They are completed when you can fluently produce the vocabulary or grammar without looking at notes. Later reviews can be less frequent and can be done without notes while doing other physical tasks like walking or standing.
